## **Overview**

*Bridging tomorrow's medical ideas with hope for today's communities.*

HOPE Research Institute conducts clinical research projects in conjunction with the nation's leading pharmaceutical companies. The Institute participates in FDA approved clinical trials - testing new products prior to public availability. HOPE provides physicians with opportunities to incorporate novel therapies into their practices. HOPE Research Institute is an independent, multi-specialty, investigative research facility dedicated to conducting clinical research trials phase II-IV. We are dedicated to developing and maintaining long-term relationships with our sponsors and establish HOPE Research Institute as a premier clinical research center.

HOPE boasts the talents of its experienced clinical researchers, including NIH certified investigators and ACRP certified study coordinators. HOPE Research Institute can conduct in-patient and outpatient clinical trials across the Phoenix metro area. With experienced investigators and study staff in several therapeutic areas, HOPE can bring its expertise to study sponsors and projects of various interests. HOPE Research Institute works only with board-certified/eligible physicians and our study coordinators are experts in their field.

## **Clinical Research Experience**

HOPE Research Institute has 10+ years of cumulative experience conducting studies in the following therapeutic areas:

- Orthopedics
- Neurology
- Pain Management
- Podiatry
- Ophthalmology
- Women's Health
- CNS
- Geriatrics

## **Facility Description**

When first arriving to the clinic you are welcomed into an inviting and comfortable patient waiting room. Beyond that, you can expect to find several large exam/consultation rooms. Research equipment includes ECG machines, -20 and -70 degree freezers, sample processing lab, crash cart, secure CRF storage, and more. There is quite space available for monitoring and a conference room for training and initiations.

HOPE's lab is stocked with basic lab supplies and has several centrifuges, a microscope, -20 and -70 degree freezers, and refrigerators. All blood draws are done on site for patient convenience. Business offices are all located on site, along with a conference room, monitoring stations and a small but efficient employee break-room. Monitors have access to telephone, fax, copier, and Internet while they are visiting. Picks by Airborne, UPS and Fed-Ex are done on a daily basis.
